EXPERIENCE TEXTILE INNOVATION LIVE: TERROT, PART OF THE SANTONI GROUP, AT CAITME 2025

Chemnitz, September 8, 2025 - Terrot Textilmaschinen GmbH, a leading developer of high-performance circular knitting machines based in Chemnitz, will exhibit alongside the Santoni Group (Santoni | Terrot | Jingmei | Pilotelli) at the prestigious Central Asian International Textile Machinery Exhibition 2025 in Tashkent, Uzbekistan. The exhibition will take place from September 9 to 11, 2025 at the Uzexpocentre NEC.

At **Pavilion 2, Stand D30, Santoni Group** will showcase their latest innovations and solutions for the global textile industry.

A highlight of the presentation will be exclusive machine demonstrations from the Santoni Group portfolio:

- **Santoni** - Zenit HS2 32" 28gg | SJ 4 cam track machine | ideal for underwear, sportswear, and swimwear
- **Jingmei** - JFG 34" 18gg Tubular | Professional rib machine, primarily for rib and interlock fabrics
- **Pilotelli** - JVCE-4 32" 28gg | High productivity single jersey, pique mesh, and two-thread fleece, with single jersey output up to 26.2 kg/h

The offering is complemented by a versatile portfolio of fabric samples from **Terrot**, designed for use in sports, leisure, automotive, home, technical, and medical textiles - demonstrating innovation, performance, and design flexibility at every stage.

Visitors will gain first-hand insights into state-of-the-art smart factory solutions, showcasing next-level efficiency, quality assurance, and digital control in textile manufacturing. Our expert teams will be on hand for technical discussions, application advice, and customized solutions. Live demonstrations and interactive presentations will allow to experience the full capabilities of the machines in real time.

"As part of the Santoni Group, we are excited to showcase our innovations together at CAITME 2025 and engage with a global professional audience," says Martin Vorsatz, CEO of Terrot Textilmaschinen GmbH. "Our collaboration with Santoni, Jingmei, and Pilotelli reflects our shared vision of driving the future of textile machinery, combining smart technology, sustainability, and customer-centric innovation to unlock new opportunities across the industry."
